

Additional mRNA COVID-19 Vaccines for Moderately to Severely Immunocompromised People

Overview

The U.S. Food and Drug Administration (FDA) has issued Emergency Use Authorizations (EUA) for additional doses of mRNA COVID-19 vaccines for moderately to severely immunocompromised people. People with immunocompromising conditions or who take immunosuppressive medications or therapies are at increased risk for severe COVID-19. Studies indicate that some immunocompromised people have a reduced immune response following a primary COVID-19 vaccine series compared to vaccine recipients who are not immunocompromised. Studies have further demonstrated that an additional mRNA COVID-19 vaccine dose after an initial 2-dose primary mRNA COVID-19 vaccine series in some

Date: Tuesday, August 17, 2021

Time: 2:00 pm - 3:00 pm (ET)

COCA Call Objectives

At the conclusion of the session, the participant will be able to accomplish the following—

1. Cite background information on the topic covered during the presentation.
2. Discuss CDC's role in the topic covered during the presentation.
3. Describe the topic's implications for clinicians.

4. Discuss concerns and/or issues related to preparedness for and/or response to urgent public health threats.
5. Promote health improvement, wellness, and disease prevention in cooperation with patients, communities, at-risk populations, and other members of an interprofessional team of healthcare providers.

Presenters

To Be Announced

The Emergency Risk Communication Branch in the Division of Emergency Operations, Center for Preparedness and Response is responsible for the management of all COCA products.

For information about this update or other clinical issues, or to send your feedback, please contact us at coca@cdc.gov
