**Evacuation of Facilities in Disasters Systems (eFINDS)
Nursing Homes, Adult Care Facilities, Hospitals and
Local County Health Departments**

Background:

The eFINDS application is the Health Commerce System (HCS) <https://commerce.health.state.ny.us> platform for sharing of evacuee location information when facilities need to relocate their people. The application captures minimal amounts of data and allows facilities to track the evacuee movement to other facilities, facility types or temporary shelters. This information is shared in real time by Health Commerce System authorized users statewide, and was designed to document the location, as well as provide day to day or hourly updates as needed.

eFINDS is a role-based application, therefore, the HCS Coordinator will need to assign the appropriate HCS users to the eFINDS Reader (for LHDs & NYSDOH ROs), or the facility eFINDS Data Reporter or eFINDS Reporting Administrator role.

Purpose of Training:

This course is an instructor led webinar demonstration. At the end of the training session, the participant will be able to:

- List the new statuses in eFINDS 3.0 and the corresponding actions and buttons used to update the status.
- Determine which report to select to review certain data about an operation, a facility or person, and which reports can be exported.

As an Evacuating/Sending facility

- Determine best method to register people and update their statuses to Evacuated, SIP or Repatriated.

As a Receiving Facility

- Determine the best method to receive people from an evacuating facility, and update their status to Received, Repatriated Initiated or Will Not Repatriate.

The session concludes with hands-on exercises.

Target Audience:

- Facility eFINDS Data Reporter and/or eFINDS Reporting Administrator; and
- County Health Department & Regional Office eFINDS Readers.
