

SEPSIS SUMMIT

IMPROVING SEPSIS PREVENTION, SCREENING
AND INTERVENTION IN THE COMMUNITY AND
ACROSS THE CONTINUUM

JUNE 15, 2022 | 9AM – 3:15PM | ALBANY HILTON

SEPSIS IS A MEDICAL EMERGENCY

Sepsis impacts individuals across the entire continuum of care, with 80-90% of sepsis related infections occurring in home and community. CMS projected-Medicare costs for sepsis admissions to hospitals and nursing homes are \$62 billion, for 2019 alone.

Sepsis deaths can be substantially preventable, but the solution requires participation and collaboration across the entire health care system.

New York is implementing pace-setting policies and innovations in combatting sepsis:

- Hospitals have implemented NY's "Rory's Regulations" and sepsis protocols, schools have implemented NY's "Rory's Law" (both led by ENDSEPSIS – The Legacy of Rory Staunton);
- Home care agencies have implemented the Home Care Association of New York State's (HCA) home care sepsis screening and intervention tool and protocol, assisted by Sepsis Alliance and ENDSEPSIS;
- Sepsis Alliance is providing templates for sepsis education and intervention across sectors and practice disciplines, and is now launching the Sepsis Innovations Collaborative;
- EMS providers are guided by sepsis collaborative protocol;
- HCA and 4 major health systems with pediatric home care programming in New York State are currently beta testing a first-of-a-kind tool for pediatric sepsis screening and intervention in home care; and
- IPRO has been collecting and reporting key sepsis data and been on the forefront of education and early recognition efforts.

JOIN US!

HCA Education and Research (HCA E&R) has been awarded a statewide grant by the Mother Cabrini Health Foundation to Improve Sepsis Prevention, Screening and Intervention in the Community and Across the Continuum, which is providing support for expanded sepsis efforts, including this major statewide summit. Join partners across the continuum in this major collaborative discussion on sepsis.

Hear the developments and vision of the state, national and industry experts. Learn the latest facts. Participate in discussion of sepsis as it relates to every sector, sepsis in special needs populations, and sepsis collaborative strategies and vision.

Be part of this summit and its follow-up efforts to promote effective sepsis response engaging all system sectors to work together, quickly, efficiently, fully informed and synchronized to mitigate the deadly risk of sepsis.

ALL SECTORS ARE ENCOURAGED TO PARTICIPATE

Home care, hospitals, EMS, physicians, nurse practitioners and all health disciplines, health coverage plans and programs, nursing homes, hospice, adult care/assisted living, behavioral health, mental health, community health centers and other ambulatory providers, researchers, state and federal officials, consumer education and advocacy organizations, and more.

The Sepsis Summit is provided **FREE** of charge with HCA E&R funding from the Mother Cabrini Health Foundation.
