

Injury Tracking Application

OSHA is reminding employers to submit their 2022 OSHA Form 300A (Summary of Work-Related Injuries and Illnesses) data by March 2, 2023.

Who is required to submit Form 300A data?

- Establishments with 250 or more employees that are required to keep OSHA injury and illness records.
- Establishments with 20 to 249 employees in [designated industries](#).
- Establishments under Federal OSHA jurisdiction can use the [ITA Coverage Application](#) to determine if they are required to electronically report their injury and illness information to OSHA. Establishments under State Plan jurisdiction should contact their [State Plan](#).

How to submit Form 300A data:

As part of the Department of Labor's IT modernization and security enhancement efforts, the [Injury Tracking Application](#) transitioned its login procedure to Login.gov — a secure sign-in service used by many government agencies. Current and new account holders need to create a Login.gov account to submit their 2022 injury and illness data. Detailed guidance on how to carry out this change is available as a [job aid](#) and [video](#).

If you have questions, visit the [FAQs](#) webpage. If the FAQs don't address your questions, complete the Help Request Form located on the page. Thank you for your cooperation.
