

INTRODUCTION

Welcome to the documentation for LHCSA (Licensed Home Care Services Agency) and ALP (Assisted Living Program) LHCSA Statistical Report using the Universal Data Collection System (UDCS), a data collection tool that enables you to enter data for submission to the Department of Health in a spreadsheet-like environment. In the past the platform used to collect the Statistical Report information was the Health Electronic Response Data System (HERDS). This has been upgraded to UDCS because it offers a more familiar, Excel-like interface and more powerful editing capabilities.

A UDCS data collection application has two parts – the UDCS Report Manager and Shell, which manage the reports on your computer and is like the Microsoft Excel executable, and the reports or formats that correspond to spreadsheets. This document will guide you through the process of downloading and installing the UDCS Report Manager and Shell and the reports.

NOTES:

- A Health Commerce System (HCS) account is required to download the UDCS Report Manager, Shell, and the reports.
- The Report Manager requires Windows 7 or later operating system. The software WILL NOT operate correctly with previous operating systems such as Windows Vista or Windows XP and CANNOT be run on an Apple computer.
- The software, executables and reports, must be installed on the computer of the user who will be entering and submitting the data. The user installing the software must have Windows Administrator privileges on the computer on which it is being installed. The Windows Administrator must not use the “Administrator Shortcut” – where the user is signed on to the computer, but the Administrator right clicks and chooses “Run as Administrator”. The Administrator must sign on to the computer.
- Only users who were assigned the HCS Administrator role **when the application was released** will be able to submit data. Other users can be added afterward but a request must be sent to HCStatRpts@health.ny.gov after the user has been assigned the HCS Administrator role.
- A single data file (this file has an extension of .pnp) should be created for each licensed site that your organization operates.
- A single copy of the data file can be stored in a location where multiple people can access it. This will enable people to enter the data that is appropriate for their organizational function – e.g. business office personnel entering the cost and revenue data and human resources personnel entering staffing and wages data. **HOWEVER, ONLY ONE PERSON SHOULD ENTER DATA AT A TIME.** If multiple people are entering data at the same time, only the data from the last person who saved will be retained.

Installing the Software, Reports and Documentation

1. Login to the HCS.
2. Click on **Healthcare Financial Data Gateway** in **My Applications**.
3. If it is not there:
 - a. Click on the **My Content** tab at the top of the HCS home page.
