**Artificial Intelligence and Its Impacts on
Emergency Preparedness for New York City
Home Care Providers**

**Virtual Event
March 27, 2024 @ 11am – 12:15pm**

You won't want to miss this!

AI-driven solutions are reshaping the way healthcare systems and professionals prepare for and respond to emergencies, whether they are natural disasters, pandemics, or other crises.

Join us for this free, exciting and informative discussion on how AI plays a pivotal role in health and home care emergency preparedness by providing early warnings, optimizing resource allocation, enabling remote care, and integrating data for better decision-making.

While AI brings significant benefits, it also raises ethical concerns that need careful consideration in the development and deployment of AI solutions in healthcare emergencies.

Are you prepared?

About the Presenter: Tom Kitchen, MECM serves as Manager of Emergency Management for The Hospital and Healthsystem Association of Pennsylvania (HAP) where he brings over 10 years of public safety experience in emergency management, fire rescue, and the emergency medical services. He works to enhance the operational capacity and preparedness of the commonwealth's hospitals and health systems while also advancing policy

initiatives that allow for increased hazard resilience.

Previously, he was the Emergency Management Coordinator for a Florida county where he served in a leadership role throughout a multitude of disaster incidents and Emergency Operations Center activations including those for hurricanes, tornadoes, the COVID-19 pandemic, civil disturbances, ecological threats, wildfires, and large special events. He has been recognized by his peers as a subject matter expert in emergency management, evidenced by his work within Florida's Regional Domestic Security Task Force, as well as state and federal intergovernmental agency coordination in Southern California.
